NURSE TRAINING SCHOOLS, 1919–20.

This report contains summaries by States, but no detailed statistics of individual schools. Such statistics were published in Bureau of Education Bulletin, 1918, No. 73, and only slight changes have occurred since that document was printed.

Graphic and interpretive treatment of the data in this bulletin will appear in a bulletin to be published later, entitled Statistical Survey of Education for 1919–20, and will eventually be incorporated with this report in the Biennial Survey of Education for 1918-20.

SCHOOLS IN OUTLYING POSSESSIONS.

Although statistics were requested from nurse training schools in all our outlying possessions,the only reports received from them were from two schools in Porto Rico. The nurse training school of St. Luke's Memorial Hospital, at Ponce, reported 21 nurse pupils, 5 graduates, 60 beds, and 40 patients daily on an average. The minimum age for admission is 16 years, and eighth-grade education is required. The nurses have nine hours of duty daily, and the length of the course offered is three years. The remuneration granted for each year of the course is $60.

The nurse training school of the Presbyterian Hospital, at San Juan, reported 34 pupils, 7 graduates, 65 beds, and 64 patients on an average. The minimum age for admission is 17 years, and the minimum educational requirement is one year of high-school work. Nine hours of duty are required daily, and the course offered covers a period of three years. The remuneration given to the nurse pupils is $48, $72, and $120 for the first, second, and third years of the course, respectively. The statistics contained in the tables do not include these figures.

TUITION.

Of the 1,755 nurse training schools reporting, only 46, or 2.6 per cent, charge any tuition whatever. Forty-five of these schools specify a tuition fee for the first year, and 14 charge a fee for the second and the third year. Thus it is seen that 69 per cent of the nurse training schools charging a tuition in the first year of the course discontinue such charge after the first year. One school, contrary to the usual rule, specifies a tuition fee for the second and third years only. The tuition the first year ranges from $7 to $96, and that for the second

and third years from $12 to $60. The tuition rates, however, are not especially significant, since 29 of the 46 schools charging tuition grant a remuneration also in the first year, and the schools charging a tuition fee in the second and third years grant a remuneration as well, with but a single exception. In the 29 schools giving a remuneration in the first year, and also specifying a tuition fee, all but one grant a remuneration as high or higher than the tuition rate. Consequently, only 18 schools charge a tuition fee in the first year in excess of the remuneration. In the second and third years of the course the remuneration equals or exceeds the tuition fees in all the 14 schools except one. It may be concluded, therefore, that tuition fees when specified are usually offset by an equal or greater remuneration.

TABLE 1.—*Comparative statistics of nurse training schools, 1880–1920.*

Years.	Schools.	Nurse pupils.	Graduates.	Capacity of hospitals (beds).	Average daily number of patients.
